

Table 14: IFT and CC affects on units Guarding Prisoners based on Unit Size.

Rules Sections: A20.5-.52

Situation: Good Order Infantry unit Guarding Prisoners. Affects on IFT FP and CC FP based on the US of Prisoners compared to Guard.*1

	IFT FP (outside of hex)	CC FP while Guarding*
US of Guard \geq US of Prisoners	Normal, may fire at other units outside of hex.	X 1/2 FP for CC attack v. non-prisoners, normal FP for CC defense
US of Guard $<$ US of Prisoners^{*2}	May <u>not</u> attack any other unit other than the Prisoners in CC.	

Notes:

*1: CC attacks involving Prisoners are sequential (Prisoners first).

*2: The US of Prisoners cannot exceed 5X the US of it's Guard.
